# WEB DESIGNING {FRONT END}

FRONT END?

The term frontend refers to the graphical user interface (GUI) that your users can directly interact with, such as navigation menus, design elements, buttons, images, and graphs.

FRONT END: HTML+CSS+JAVASCRIPT+BOOTSTRAP

HTML

- *HTML- "HYPERTEXT MARKUP LANGUAGE" --is the language used to tell your web browser each part of a website is. each part of a website is. So, Using HTML, you can define headers, Paragraph links, images and more, so your browser knows how to structure the web page you are looking at.*
- *When creating a website, HTML is the foundation that holds all the content and design elements together.*
- *It gives structure to the web page, defining things like headings, paragraphs and links full. Without HTML, a web page would just be a jumbled mess of text and images.*

SYNTAX

```
<!DOCTYPE html>

<html>

    <head>

       <title>Page Title</title>

    </head>

    <body>
```
